

PARENT CARERS TOGETHER

Bournemouth Christchurch Poole

Written Statement of Action

The Written Statement of Action is the detailed plan to improve the key areas identified in the Ofsted/CQC Inspection report published last summer. You can read the Ofsted/CQC report elsewhere on this page by clicking [HERE](#).

The Written Statement of Action has been co-produced with the Local Authority SEND Services, Dorset Health, Parent Carers Together (the forum) and other parent carer groups. It focusses on the priorities to drive through improvements and long-term sustainable change across SEND services for all children, young people and their parents and carers in Bournemouth, Christchurch and Poole (BCP).

Click [HERE](#) to view the Written Statement.

Parent Carers Together are pleased to have been involved in developing this Written Statement to ensure the voice of parents and carers are heard. We remain committed to working with partners to create and deliver long-term sustainable improvements for all SEND families in BCP. We look forward to increased co-production with parents and carers across education, health and social care.

Parent Carers Together sits on all key boards for this improvements work. We want to ensure that the ongoing improvement work from the Written Statement has a tangible positive effect on the lives of children and young people with SEND and their families.

This is one of the many reasons why Parent Carers Together encourages all families with an interest in SEND to join us and make sure your views are heard on what is happening locally. If you are interested in this work, or any of the other boards and projects we are involved in, we are recruiting additional representatives, please check out our [volunteer opportunities](#).
